

## Services & Information 2015

Professional, practical advice and expertise  
on a wide range of environmental issues.

## Planning Services

E4environment has extensive experience across the renewable energy and waste sectors in successfully completing planning applications, which always require significant environmental input to support the submission. Our service provides complete project management from pre consultation, environmental impact assessment, application completion, through to discharging of planning conditions and public liaison.

## Environmental Permitting Services

We provide expert support, guidance and project management to individuals and businesses across the UK and Ireland looking to attain an exemption or environmental permit. Whether it's a standard permit, bespoke permit or research and development permit, E4environment can help.

E4environment has prepared and completed applications for many different types of waste management operations, some of these include, composting sites; waste transfer stations; waste recycling sites; anaerobic digestion facilities; WEEE facilities; industrial installations; poultry and pig units and new technologies.

## Renewable Energy

E4environment are able to offer services that allow the client to consider their best options to produce renewable energy feasibility studies or assess existing energy usage as well as ensuring legal compliance with schemes such as the Energy Savings Opportunity Scheme (ESOS).

## Packaging and WEEE Data Service

We can establish the clients data needs, gather data from suppliers, carry out sampling, analyse data, produce data return forms for your preferred compliance scheme and attend the Environment Agency Audit. This service will allow the client to be fully compliant with the producer responsibility regulations.

## Environmental Management

E4environment will work alongside the client to construct a framework to ensure that their company is compliant with relevant environmental legislation.

We can support clients to achieve ISO14001 accreditation or develop a bespoke management system, identify ways the client can reduce their environmental impacts, save resources and ultimately save money. We can also offer compliance training on the developed systems.

Our Green Achiever Scheme offers an environmental good practice framework and can also be used as a stepping stone towards ISO14001.

## Ceequal

Our in-house CEEQUAL (Civil Engineering Environmental Quality) Assessors can complete the assessment for the client. E4environment can also bring experience of what the verifier will be looking for to add value to the CEEQUAL assessment process, enabling the client to achieve a greater environmental quality and social performance to their projects.

## Who we are

E4environment is an environmental consultancy providing professional, practical advice and expertise to both the private and public sector on a wide range of environmental issues. Established in 2000, we have many years of experience providing specialist advice on a wide range of environmental topics.

Our service is professional, friendly and supportive, allowing the client to achieve their project aims; comply with legislation; save resources and money; and/or improve their environmental credentials.

We also offer products that support businesses to enhance and manage their green credentials and legal compliance obligations.
