Who we are

E4environment is an environmental consultancy that has been providing professional, practical advice and expertise to both the private and public sector on a wide range of environmental issues since 2000. We pride ourselves on providing a professional, friendly and supportive service, allowing the client to achieve their project aims; comply with legislation; save resources and money; and improve their environmental credentials.

We also offer products that support businesses to enhance and manage their green credentials and legal compliance obligations.

Services for the Metals Sector

Managing your environmental issues

Packaging Data Returns

This service will enable you to be fully compliant with the producer responsibility regulations. We will submit your data for you and prepare a methodology report for your records or EA audits you may encounter. We will determine the best method for data management/collection based upon your business activities. Looking at your existing processes we will work with you to make the process as smooth as possible.

Environmental Permitting

We provide expert support, guidance and project management to businesses looking to obtain, modify or revoke an environmental permit. E4environment has prepared and completed applications for many different types of waste management operations, including, industrial installations, construction sites, waste recycling sites and WEEE facilities.

Environmental Management Systems

E4environment will work alongside you to design, build and implement an EMS including a policy, environmental review, procedures, manual, training, aspects and legal registers, target setting and auditing. This can be to ISO14001 or EMAS or a bespoke system.

ESOS

At E4environment, we can guide companies through complying with ESOS. We can carry out the appropriate audits and help identify cost effective energy saving methods for you, making it as simple as possible to meet the mandatory reporting requirements.

Environmental Accreditation

We can support companies in demonstrating their environmental awareness improving CSR, assisting them in getting a recognised accreditation. A powerful tool for winning tenders.

Corporate Sustainability

Corporate sustainability demonstrates a company's long term commitment towards a 'green strategy'. This takes into consideration every dimension of how a business operates. It enhances consumer and employee confidence and wellbeing. E4environment can work with you to develop a strategy.

Mueller Europe Ltd

Mueller Europe is a manufacturer of copper tubes for plumbing, heating and a wide range of industrial applications. E4environment has worked with Mueller Europe since 2000 completing their packaging data returns, supporting them with ISO14001 and providing monthly legal regulatory updates.

Befesa

Befesa Salt Slags provide a complete solution for the recycling of aluminium salt slags, drosses and aluminium wastes. E4environment has assisted Befesa with their Environmental Management System, having recently conducted an ISO 9001, 14001 and BS OHSAS 18001 gap analysis prior to their having an external audit to ensure compliance. We have previously compiled their aspects and legal registers and we are currently working on their EMAS (Eco-Management and Audit Scheme) Statement ready for re-accreditation.

Tension Control Bolts

Tension Control Bolts Ltd are the designer, manufacturer and worldwide distributor of high Strength Friction Grip/Pre-loaded bolting system. E4environment conducted an Environmental Review to assess the priority action areas and ensure Tension Control Bolts Ltd meet their legal and environmental permit obligations and consents to discharge

ATI Allvac Ltd

ATI Allvac Ltd produce diversified speciality materials and components for aerospace and defence, oil and gas/chemical process industry, electrical energy, medical and automotive. Since 2000 E4environment has supported Allvac in completing their annual packaging data returns for the Environment Agency.

Bridgnorth Aluminium

Bridgnorth Aluminium produce a high purity aluminium alloy product range and internally have a recycling process for scrap. E4environment supported Bridgnorth Aluminium to comply with the ESOS Regulations 2014.
